2024/06/04 08:38 1/1 General information

## **General information**

Hard disk image now consist from the following parts:

- MBR
- Boot partition with boot sector and ext2 filesystem (as fast as we will provide other filesystems drivers filesystem can be differ from ext2)

ext2 file system contains:

- FreeLdr (os2ldr)
- Kernel and modules initializer (bootstrap)
- Microkernel (fiasco)
- Root task (roottask)
- Other servers

## **Creating image**

To create hard disk image you can use following logic and tools:

From:
